

## FOAM PIG SPECIFICATION

### Application

Foam pigs are used for a wide variety of applications, such as for flooding, dewatering and drying, as well as cleaning, gauging and batching operations. Foam pigs can also be used for proving pipelines suitability for pigging with less flexible pig types such as metal bodied pigs.

### General Information

Various optional extras are available, some of which are listed below:-

- Variable Foam Densities (2lb Light, 5lb Medium & 8lb Heavy)
- Cleaning Brushes (carbon steel, stainless steel or nylon bristle)
- Bare, Criss Cross Coated or Fully Coated
- Bi-directional capability
- Abrasive Coating
- Dewaxing Pads
- Descaling Studs
- Gauging Plate
- Tracking Device
- High Performance Polyurethane
- Pluggable Bypass Ports
- Magnets
- Pulling / Lifting Loops
- Extended Body (Long Run / Traversing)

<b>Size range</b>	2" to 56"
<b>Bore Passing</b>	Up to 40% bore restrictions
<b>Minimum Bend Radius</b>	1D radius
<b>Materials</b>	Polyurethane elastomer
